PROFILE

Backend Software Engineer with strong experience building production systems using PHP (Symfony) and C#/.NET, RESTful APIs, and microservice architectures. Skilled in Docker, CI/CD, and automated testing. M.Sc. Data Science candidate at FAU Erlangen-Nuremberg with a focus on Machine Learning and Time-series forecasting.

PROFESSIONAL EXPERIENCE

Working Student Developer, *Tradebyte Software GmbH* *Jun 2023 – Mar 2025, Ansbach, Germany*

- Built and maintained backend services for a SaaS platform integrating 1000+ brands across 90+ marketplaces (PHP Symfony, MySQL).
- Designed and extended RESTful APIs in a microservice architecture focused on scalability and reliability.
- Wrote Unit & E2E tests (PHPUnit, Behat); built Kibana dashboards that reduced bug resolution time by 20%.
- Contributed to CI/CD pipelines, code reviews, and SOLID-compliant refactoring.

Software Engineer, *Crescentic Digital Ltd* *Feb 2021 – Dec 2021, Karachi, Pakistan*

- Built scalable backend services using C# and ASP.NET , designing RESTful APIs for enterprise applications.
- Developed microservices with Entity Framework and SQL Server; optimized queries to improve performance.
- Implemented authentication and authorization using JWT and ASP.NET Identity.

Software Developer, *AALogics Ltd* *Aug 2018 – Nov 2020, Karachi, Pakistan*

- Built and optimized Magento 2 backend modules; improved API performance via SQL optimization and caching.
- Managed Dockerized deployments on Linux (Apache, Nginx) and supported production releases.

EDUCATION

M.Sc. Data Science, *University of Erlangen-Nuremberg (FAU)* *Oct 2021 – Oct 2025, Erlangen, Germany*

Thesis: Wind Power Forecasting **Focus:** Pattern Recognition, Time Series, AI, Deep Learning

B.Sc. Computer Science, *FAST – NUCES* *Aug 2014 – Jun 2018, Karachi, Pakistan*

Key Courses: Web Programming, Database Systems, OOP & Design, Data Structures

SKILLS

PHP (Symfony, Laravel) | RESTful APIs | Magento | C# | ASP.NET | JWT | Python | Docker | AWS | Linux | CI/CD | Apache | Nginx | MySQL | PostgreSQL | OracleDB | Snowflake | PHPUnit | Behat | Kibana | Postman | Git | Jira | Pandas | NumPy | TensorFlow | PyTorch | Power BI

PROJECTS

TradeByte TB-One *Jun 2023 – Mar 2025*
Enterprise SaaS platform ($6B+ annual transactions) for the global fashion industry. Built backend APIs, Kibana monitoring, and CI/CD-driven releases using PHP (Symfony) and MySQL.

Wind Power Forecasting — M.Sc. Thesis *Nov 2024 – May 2025*
Time-series forecasting system in Python/PyTorch on large historical datasets; proposed scalable ML pipeline for enterprise backend integration. Designed experiments on large historical datasets, applying evaluation metrics and validating model performance in realistic scenarios.
